

TroveSafe™ Alarm System

Tamper-Resistant Alarms

Trucking and Asset Wireless Security

Key Features

- *Extreme cargo protection:
Patented alarm system*
- *Secures container cargo doors*
- *Designed for standard TEU
containers; mounts on rollup and
other door designs*
- *Sophisticated data tools for
managing cargo by security staff*
- *Deterrent factor prevents theft
attempts and keeps drivers safe*

Affordable **ASSET PROTECTION** For Trucks and Stationary Storage Units

TAV Network's TroveSafe™ alarm prevents theft by securely attaching to the exterior doors of stationary truck containers and storage units. Magnetic feet or a mounting plate (included) attach to the container: the alarm can be attached or removed by the owner whenever the container is stationary. A piercing 120 db audible alarm and wireless alert notifies cargo owners in the event of tampering or a break-in. Wireless and cloud-based asset management software enables notification of owners even if the alarm itself is interfered with or destroyed. The patented alarm features seven anti-tamper levels of protection and is nearly impossible for thieves to bypass, while the exterior clearly warns and deters would-be thieves.

With **TroveSafe™**, you can have confidence that your stationary truck, container or storage unit doors are securely protected at the highest possible level.

TroveSafe™ Alarm

Tamper-Resistant Alarm System

Keep Assets Secure With The TroveSafe™ Alarm

Cloud-based Asset Management Software

Reduces theft complications with verifiable log data or prevent thefts altogether. Cargo owners can manage single or multiple alarms using the cloud-based asset management software. A detailed log notes when the alarm is activated / deactivated for management, law enforcement, and insurance purposes. Multiple alarms can be managed from any combination of devices, including phones, tablets, laptop, and desktop computers. TroveSafe makes your own cargo safer and provides added value to your transport customers.

Product Technical Specifications

- Magnetic mounting via four legs or included mounting plate
- Dimensions: 9.5" x 6.5" x 3", Weight: 0.625 kg
- Time / Date armed
- Time / Date disarmed
- Low battery message
- Temperature range: -15F to +120F
- Battery life: 30 days maximum
- Cellular Carrier: Verizon network
- AWS cloud based data collection repository
- Strong audit and archive
- E-mail alert
- Text alert
- Voice phone call alert
- User interface for configuration and data retrieval
- Anti-tamper features
- Mobile app (Android and iPhone)

Headend Software Specifications

- Automated Alarms and Notifications
- Secure Wireless Communications over VPN
- Multi-Tenant User Administration: Multi-Level, Role Based Privileges; SaaS Subscription Management
- Cloud based processing for high availability
- Simple Device Administration: Configuration Management, Entry of installation-specific data, Automated health checks
- Data and Service Analytics
